Hand Sanitizer Recipe

Having a hard time finding hand sanitizer on the shelf? Try this recipe to make some at home. This will make one cup and can be doubled or tripled. Combine 2/3 cup rubbing alcohol, 1/3 cup aloe (find it in the sun screen aisle), and if fragrance is desired, 6-8 drops of an essential oil of your choice (find at places like Whole Foods). Put into a pump or squeeze bottle & use frequently. I found that inverting the bottle & shaking vigorously did the best job of mixing the ingredients. It felt very thin the first night, but the next day it felt thicker and remained emulsified. It was not drying on the skin.
